

Construction:
 All masonry walls to be constructed with a minimum of 100mm thick brickwork and a minimum of 100mm thick concrete base. All masonry walls to be constructed with a minimum of 100mm thick brickwork and a minimum of 100mm thick concrete base. All masonry walls to be constructed with a minimum of 100mm thick brickwork and a minimum of 100mm thick concrete base.

Roofs:
 All roofs to be constructed with a minimum of 100mm thick concrete base and a minimum of 100mm thick brickwork. All roofs to be constructed with a minimum of 100mm thick concrete base and a minimum of 100mm thick brickwork.

Windows:
 All windows to be constructed with a minimum of 100mm thick concrete base and a minimum of 100mm thick brickwork. All windows to be constructed with a minimum of 100mm thick concrete base and a minimum of 100mm thick brickwork.

Doors:
 All doors to be constructed with a minimum of 100mm thick concrete base and a minimum of 100mm thick brickwork. All doors to be constructed with a minimum of 100mm thick concrete base and a minimum of 100mm thick brickwork.

Foundations:
 All foundations to be constructed with a minimum of 100mm thick concrete base and a minimum of 100mm thick brickwork. All foundations to be constructed with a minimum of 100mm thick concrete base and a minimum of 100mm thick brickwork.

External Steps:
 All external steps to be constructed with a minimum of 100mm thick concrete base and a minimum of 100mm thick brickwork. All external steps to be constructed with a minimum of 100mm thick concrete base and a minimum of 100mm thick brickwork.

Other Details:
 All other details to be constructed with a minimum of 100mm thick concrete base and a minimum of 100mm thick brickwork. All other details to be constructed with a minimum of 100mm thick concrete base and a minimum of 100mm thick brickwork.
